

# CHILD SURVIVAL, ELCT CHAKWALE STUDENT CENTRE

AN UPDATE FROM  
TANZANIA

## COVID-19 UPDATE - TANZANIA

Under its new president, Tanzania has begun a COVID-19 vaccination programme.

Tanzania has administered at least 7,280,582 doses of COVID vaccines so far. Assuming every person needs 2 doses, that's enough to have vaccinated about 6.3% of the country's population.

Compassion Child Survival interventions are open and holding normal activities

## THE DIFFERENCE YOU'RE MAKING

Here are some highlights of how life has changed significantly for the mothers enrolled in the intervention in the last quarter:

15 mothers and their babies have been actively meeting as a community.

8 babies were born, attended by a health professional.

1 woman is pregnant.

12 women are breastfeeding their babies.

## BALANCED DIETS

The District Nutrition Officer conducts a lesson once a month for the mothers. She teaches the group how to prepare nutritious food during pregnancy and breastfeeding. This, in addition good hygiene practices, will help prevent malnutrition.

## SAFE PLAYTIME

Play and stimulation is essential to healthy development. Here, the mums are learning about safe spaces to help babies and toddlers play independently while mothers do household chores.

# MAKING A DIFFERENCE

Thank you for your support which is making a life-changing difference to the mothers and children of this community.

“Child development is the foundation for community and economic development. Capable children are a foundation for prosperous nations.” – Kate Naliaka, Global Principal Program Development Advisor for Compassion International.
